Note: HIV disease or HIV infection refers to a diagnosis of HIV infection regardless of the stage of disease (stage 1, 2, 3 [AIDS], or unknown) and refers to all persons with a diagnosis of HIV infection

NA = Not available; -- denotes that the rate is not calculated

[^]Crude rate per 100,000 population; Current year populations used for rate calculations

*As of December 31, 2015; All counts represent name-based reported cases unless otherwise noted

**As of December 31, 2014; All counts represent name-based reported cases unless otherwise noted; U.S. reported case counts represent 50 states, the District of Columbia, and 6 U.S. dependent areas

***Estimating case counts adjusts for reporting delays and missing risk-factor information but not for incomplete reporting

Pennsylvania initiated confidential name-based reporting in 2002; In 2005, the CDC recommended that all states and U.S. dependent areas adopt confidential, name-based HIV infection case reporting
